DEPARTMENT OF BUSINESS ADMINISTRATION

STUDENT CENTRIC METHODS

TEACHING METHODOLOGIES

Teaching methodologies:

- Student's centric-project-based learning: research based assignments, report writings, video making, creating blog page (research on products ; designing of the blog; uploading the products or services in the blog).
- Student's centric-cooperative learning/ Group activities- Class room group discussions, debates,, PPT class presentation, role plays, business games...
- Student's centric- practical exercises: practical problem solving, case study
- Student's centric- internship and field works complemented by report writings
- Student's centric- individual based assignments, class works, extempore, class room's two ways interactions-asking questions and inviting student's participation for discussion.
- Student's centric- academic counselling and tutorials

Mushroom Spawn Cultivation

An Innovative undertaking on Mushroom Spawn production by the Department of Botany

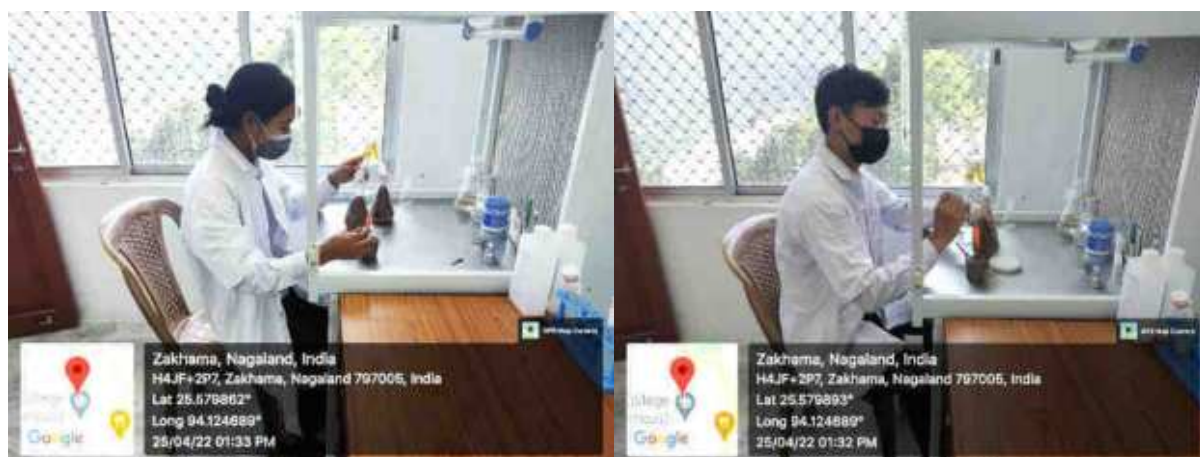

Mushroom cultivation, an environmentally friendly farming has played an integral part in agriculture. Being one of the ideal food items, mushroom needs to be explored for its impact in the economy, medicinal and nutritional properties and in the maintenance of health. There are about 2000 species of mushroom and only a small percent has been exploited the world over. Role of mushroom in sustainability and food security makes mushroom cultivation an important area to be discussed and practiced in a large scale.

Oyster Mushroom

The *Pleurotus* spp. derives their name due to the oyster-like shape. It has a wide range of temperature adaptability making it resilient to climatic conditions and therefore, available almost round the year.

Spawn production

Spawn comprises of mycelia of the fungus profusely multiplying on a substrate such as wheat or paddy grains. For the production of good quality spawn, supplies such as paddy grains, sterile laboratory conditions with laminar air flow and storage temperature of about $25\pm 2^{\circ}\text{C}$ were taken into considerations to avoid any contamination.

Students inoculating mycelium from pure culture media

NAAC Grade A (CGPA: 3.12)

Pure culture preparation

Pure culture of Oyster mushroom was obtained using Potato Dextrose Agar (PDA) media. The mycelia plug is placed on the petri plates containing the media and incubated at a temperature of $25\pm 2^{\circ}\text{C}$. In about a week or two mycelium is observed on the entire surface of the media ready to be inoculated.

Spawn preparations

Paddy grains as a suitable substrate is washed and pressurized to open the husk grains. After excess water is drained, about 20g of calcium carbonate (CaCO_3) is mixed with per kg of grains to increase the pH suitable for the rapid growth of spawn. The mixture of about 200g is filled in a polypropylene bag and plugged with cotton plugs, autoclave for about 1 or 2 hours. Once the polypropylene bags were cooled, mycelium from pure culture media and tissue taken aseptically from the stalk were inoculated inside the laminar air flow and stored in a dark room. Mycelium were observed in about a week.

PROSPECT

The opportunities mushroom cultivation holds can open ample doors for the benefit of people in need of employment and people in general. As food demand increases, mushroom cultivation can decrease burden on other food produce due to its inexpensive and easy availability of requirements needed for cultivation. For the health conscious, it serves as a great dietary food. The medicinal and nutritional properties can be explored creating more avenues. Production of good quality spawn in itself is a promising endeavor, which is the key factor for the success of mushroom cultivation.

3. PURPOSE OF THE PROGRAM:

Over the past few decades, the focus has been heavily weighted on the classroom experience. However through the pandemic, students across the world have been learning and studying using new collaborative digital tools and resources on a massive scale. This workshop facilitate participants the opportunity to learn for themselves in flexible, often collaborative ways, both inside and outside classrooms at their own pace. Introducing skill development programs will empower students to follow their own interests and be challenged where appropriate.

Mushroom cultivation technology is environmental friendly. Edible and medicinal mushrooms are produced utilizing raw materials of lignocellulosic wastes such as paddy straw, coffee waste, saw dust, sugar cane and

corn combs. The prospect of mushroom farming in generating new employment opportunities is another positive factor emanating from mushroom farming ventures. This workshop aims at developing skills and making the students become self-reliable and employable besides providing them an edge with additional skill set to meet the challenges in future.

4. HIGHLIGHTS OF THE PROGRAM:

Department of Botany, St. Joseph's College (Autonomous) Jakhama conducted a 1-Day Skill Development Workshop on Mushroom cultivation on the 25th of September 2021. A total of 64 students from the 1st and 3rd semester of the Department of Botany along with 4 students from the Department of Commerce (5th Semester) attended the workshop. The students were accompanied by 2 faculty members from the Department of Botany. The workshop was organized by Department of Botany, SJC(A) Jakhama in collaboration with Dr. Sosang Longkumer, Director, Konger Agritech, Aoyimkum, Dimapur who is a frontrunner of Mushroom production in Nagaland. Dr. Sosang Longkumer was the instructor while Dr. Toshinungla Ao, Assistant Professor, Department of Botany, St. John's College, Dimapur was the Resource person. The workshop welcome note was addressed by Ms. Asha Singh, Assistant Professor, Department of Botany, SJC(A), Jakhama following which Dr. Longkumer emphasized on the importance of mushroom cultivation and its prospects among the emerging entrepreneurs. Dr. Toshinungla, an accomplished Mushroom Taxonomist spoke about the diversity of mushrooms available in Nagaland. She briefly highlighted the identifying characteristics of edible and non-edible mushrooms and also mentioned the nutritional benefits and medicinal values of mushrooms. The attendees had intensive hands-on experience on learning how to prepare oyster mushroom cylinders. A field visit to a private mushroom farm at Aoyimkum, Dimapur was made to witness the mushroom cultivation, production and processing unit. The workshop concluded with a note of thanks by Dr. Kizukala Jamir, Assistant Professor, Department of Botany, SJC(A), Jakhama.

7. OUTCOME OF THE PROGRAM:

The 1-Day Skill Development Workshop on Mushroom cultivation was a very successful event with 2 resource persons who have shared their research works with mushrooms of Nagaland. A total of 70 participants attended the workshop. The sessions provided a handful of information such as identification of edible and poisonous mushrooms, hands-on training for preparation of bed for mushroom cultivation and its harvesting, awareness on marketing trends on mushrooms, how to be a start-up mushroom cultivator or distributors, above all to learn a means of self-employment and income generation. And as per the feedback received from the attendees, they were all encouraged, inspired and delighted having participated in the workshop.

NAME/TITLE OF THE ACTIVITY/PROGRAM: Mushroom Cultivation

Date: 31.01.2022 to 02.04.2022

Venue: Old Botany Lab, Science Block, SJC (A)

1. PARTICIPANTS DETAILS:

PARTICIPANTS DETAILS				TOTAL NUMBER OF PARTICIPANTS
NUMBER OF MALE PARTICIPANTS	NUMBER OF FEMALE PARTICIPANTS	PARTICIPANTS FROM SJC(A)	PARTIPANTS FROM OUTSIDE	
57	31	88	-	88

2. Name of the Teacher-in-charge: Dr. Thejasenuo Julia Kirha

3. PURPOSE/OBJECTIVE/S OF THE ACTIVITY/PROGRAM:

- To enhance their skill development
- To demonstrate mushroom cultivation so that students can venture independently.
- To understand the opportunities it holds.

4. OUTCOME OF THE ACTIVITY/PROGRAM:

Student performance on mushroom cultivation could yield a good result as they could produce healthy oyster mushroom with the possibility of developing this skill on their own while having a better idea on the scopes it holds.

Mushroom an important source of food with its medicinal properties is known to be a great source for humankind. In present scenario where health, employment and space for agricultural practices are of concerned, mushroom cultivation fits perfectly into the said state due to its many beneficial properties, fewer requirements of facilities for its cultivation and zero to no waste produced after it is harvested. Therefore, it becomes essential that mushroom cultivation ought to be taught not only for its many benefits but also as a means of food security.

The students of 4th Semester, comprising of 48 students and 6th Semester, comprising of 40 students, Botany Department, undertook mushroom cultivation particularly of *Pleurotus* mushroom (Oyster mushroom). The objective for mushroom cultivation was mainly to enhance their skill development, to demonstrate how they can venture mushroom cultivation independently and the opportunities it holds.

Pleurotus Mushroom cultivation on straws was demonstrated and the cultivated mushrooms by the student's showed success with each bags harvesting around three to four times. Harvested mushrooms were vended and showed the students zeal to gain more knowledge about the field. Images below showcases the efforts, interest vested in mushroom cultivation by the students.

Image 1. Straws being cut and bagged for soaking.

Image 2: Soaking of straws in lime

Image 3: Removal of excess moisture from the straws

Image 4: Layering of spawns

Image 5: Observation of Mycelium about 10 to 15 days

Image 6: Pinheads of mushroom observed

Image 7: Mushroom in full bloom

Image 8: Harvesting of mushrooms

NAME OF THE ACTIVITY: Field Trip to Kaziranga National Park, Assam

DATE: 13th October, 2021-16th October, 2021

VENUE: Kaziranga National Park, Assam

5. PARTICIPANTS DETAILS:

PARTICIPANTS DETAILS		TOTAL NUMBER OF PARTICIPANTS
NUMBER OF MALE PARTICIPANTS	NUMBER OF FEMALE PARTICIPANTS	44
29	15	

6. **NAME OF THE TEACHER-IN-CHARGE: Ms. NEITHONGUNUO ANGELA BELHO**

7. PURPOSE OF THE ACTIVITY:

- To fulfill the CBCS syllabus requirement for the Discipline Specific Elective Paper i.e. BTD 5.4: Natural Resource Management.
- To enable the students understand and experience the various types of biodiversity as well as the importance of conservation of our natural resources.

8. OUTCOME OF THE ACTIVITY:

- The students learned about the various types of floral and faunal inter dependency that exists among all living organisms in nature.
- They understood the need for maintaining an optimum balance in nature for the survival and

continuity of life on earth.

- They also gained knowledge on the existence of various plants and animal species living together in a given area and their role in nature.

Report on Field Trip (B.Sc 5th Semester) to Kaziranga National Park

The Department of Botany, St. Joseph's College (Autonomous), Jakhama organized a field trip to Kaziranga National Park, Assam from the 13th October, 2021 to 16th October, 2021 for the B.Sc 5th Semester Botany Honours Students To fulfill the CBCS syllabus requirement for the Discipline Specific Elective Paper i.e. BTD 5.4: Natural Resource Management.

A total of 40 students went for the field trip. The students were accompanied by 4 faculties viz; Ms. Neithongunuo Angela Belho, Ms. Kumari Asha Singh, Dr. Thejasenuo Julia Kirha and Mr. Antidong Jamir.

The places visited were:

1. Kaziranga National Orchid and Biodiversity Park

The Kaziranga National Orchid and Biodiversity Park is located at the distance of 2 km from the Central Range of Kaziranga, Kohora Chariali. The park is sprawling in the area of around 6 acres in the Durgapur village and is considered as the largest orchid park in the Northeast belt of India. The park has multiplied the glory of the Kaziranga in many folds. The Orchid Park boasts of having more than 500 varieties of wild orchids, 132 species of sour fruits and leafy vegetables, 46 species of bamboo, 12 species of cane and many other plants along with various species of local fishes.

The students got to witness many different species of orchids, rare endemic plants, ornamental plants etc.

The Kaziranga Orchid National park is an abode of more than 600 species of wild orchids collected from all across the north-east India region. This beautiful orchid have been placed amidst wild state in order to give

complete natural ambience taking visitors as close to nature as possible. The whole variety is preserved in a greenhouse together with some hybrid varieties; some of them have been exclusively collected from local region of the state.

2. Kaziranga National Park

One of the most sought after wildlife holiday destinations in India, Kaziranga National park's 430 square kilometer area sprinkled with elephant-grassy meadows, swampy lagoons, and dense forests is home to more than 2200 Indian one-horned rhinoceros, approximately 2/3rd of their total world population.

The students were taken for safari jeep ride through the park where they observed animals like elephants, one-horned Rhinos, birds, fishes, wild boars etc.

Undoubtedly, the park is known for its good population of animals but more than that it's the wildlife conservation initiatives that take place in the park which are more popular. With its amazing wildlife conservation activities, the park has successfully managed to grow the population of Greater one-horned rhinoceros, an endangered species.

DEPARTMENT OF ENGLISH: STUDENT CENTRIC METHODS:

USE OF LCD PROJECTOR

- ▶ LCD Projectors are used during class lectures for PPTs.
- ▶ For showing films/movies related to the course, which makes the work of literature come alive within the classroom premises and to work with experiential knowledge.
- ▶ For showing Documentaries of different societies and age, and historical events as background study related to the subject matter.

TEACHING AND LEARNING METHODOLOGY

- ▶ The Department faculties use a blend of the traditional lecture method and PPTs.
- ▶ Activity based learning, where students are given some minor projects related to their course.
- ▶ Interactive/participative methods are also used to enhance the learning of the students

DEPARTMENT OF HISTORY STUDENT CENTRIC METHODS:

Teaching Methodology

- To enhance the learning experience of the students, the department adopts **student-centric methods** such as experiential learning, participative learning and problem-solving methodologies.
- In addition to the traditional class room teaching, following are the methods adopted by the department to enhance learning:
- Quiz and extempore competition, debates, peer-learning exercise like group discussion and presentation, field trip, study tour, viva, assignments and regular conduct of class tests.

Use of LCD projector

- LCD projectors are used as visual and virtual aids for effective teaching-learning process in the classroom.
 - Power-Point presentations are used by the teachers to deliver lectures using LCD projectors.
 - Students give their presentations as part of their internal assessment in the class using LCD projectors.
 - LCD projectors are also used for showing documentaries, photographs, maps, videos and other subject-related illustrations in the class room.

Museum

- The idea of setting up of Museum was put forwarded by some students
 - Formal decision was taken during department meeting on the 24th of September 2015 for its establishment.
 - The endeavour was aimed towards preservation of rich Naga history and culture.
 - It was also set up with the goal of making the students culturally conscious and having a sound knowledge of the past.
 - The Museum was inaugurated on 29th November 2019 on the occasion of the Silver Jubilee celebration of the Department.
 - We have a total collection of 270 artifacts in the museum.
-

Total Number of the Collection

Sl. No.	Name/Nature of the Artifact	Total number of the artifact
1	Historical Collections	28

Mini-parl. held at St. Joseph's College

Students participating in the mini-parliament at St. Joseph's College (Autonomous), Jakhama, on Saturday.

Our Correspondent:
Kohima, Aug. 19 (EMN): Melchior Doulos, CEO of Entrepreneur Associates, said on Saturday that political science students must question whatever news is published about the Naga people and urged them to learn and understand the crisis and history of their people.
Speaking as a guest speaker at the annual mini-parliament of the department of Political Science, St. Joseph's College (Autonomous), Jakhama, held at the college's indoor stadium in Kohima, he stated that Nagas have a great tradition and reminded the students that Nagas have stood out from the state age past to modernity without any remorse.
He stressed the importance of learning and understanding Naga history, as well as respecting it with pride and dignity. He encouraged them to be confident in learning and understanding history by reading books about Nagas.
Saying that politics is either 'winning together or sink together', he encouraged the students to know that they are living in a society that places emphasis on equal treatment.
He recommended going beyond textbooks and pursuing Ph.D. programmes in order to research and bring up more knowledge and writings about Naga political thought and civilisation and study the political systems of such Naga villages.
The mini-parliament debated the Uniform Civil Code, communalisation of education, digital privacy, the Marburg crisis, 20 years of Nephin Bio-government, and capital punishment.
