Date: 28/02/2023

St. Joseph's College (Autonomous), is an educational institution, advocates environmental and green initiatives to save the environment and safeguard the natural resources. In conformity with the environmental conscious effort of the college and in an effort to save water, the inmates of St Joseph's College (Autonomous) Jakhama, Men's Hostel have initiated the practice of 3Rs- Reuse, Reduce and Recycle, whereby the hostellers reuse the used water for the purpose of watering the flower and vegetable garden of the hostel. It is also a policy and a mandatory practice of all the hostellers to prudently utilise the water without wasting.

The SJCMH hostellers also make use of the septic water to nourish the rose plants that are in the courtyard of the hostel. The result of proper care is evident in the blooming of the beautiful flowers which has also become an attraction for the visitors to the hostel and compliments and appreciation from them. Such practices have helped not just in reusing and saving water but has also contributed to the aesthetic beauty of the hostel and its surroundings.

NOTIFICATION

This is an information for all inmates of St Joseph's College Men's Hostel, Jakhama to follow strictly the instructions given here below:

- 1) While washing your plates and cups, all the hostellers will throw the first-wash water to the drainage but collect the final water in the containers placed near the washing basin.
- 2) The in-charges of the drainage will draw water only from the containers placed near the washing basin to be re-used while cleaning the drainage.
- 3) The in-charges of the flower garden and flower pots will use water only from the containers placed near the washing basin.
- 4) Whenever you pour the septic water for the rose plants, you will collect the hand-gloves from Sir Dalu and returned the hand gloves to the office.
- 5) Those persons pouring the septic water for the rose plants are mandatory to wash your hand thoroughly with soap after your work.
